

Visualize Your New Roof with the Help of Vertex Roofing

 vertexroofingslc.com/visualize-your-new-roof-with-the-help-of-vertex-roofing

We know that there are certain situations where someone might need to make significant changes to their roof. For some people, they might have purchased a new home and the roof might be out of style or outdated. Maybe your roof has been damaged by a storm and needs repairs. Regardless, people might have a vision for their roof but would like it to come to life. That is where our new roof visualization tool can be helpful. By [attaching your image](#) to this tool, you can see what your roof will look like once our project is done!

Selecting Roof with Visualization

We have designed a roof color visualizer and a roof shingle visualizer tool that will help you take a look at what your roof will look like when the project is done. In order to use our tool, please follow the following steps:

First, please click on the [link](#)

Then, the tool will prompt you to select an image from your computer. By clicking the link, a menu will open where you can browse your computer.

Select the appropriate image from your files and click on "upload."

The image should fit either a JPG, JPEG, or PNG format

The image needs to be no less than 1600 pixels in width yet no larger than 16 MB in size of file

Landscape format typically yields better results than others

The view of the home should be unobstructed and the image should be high-resolution

Make sure that the roof is in the center of the image

Once the image has been uploaded, it should appear in the appropriate spot in the tool

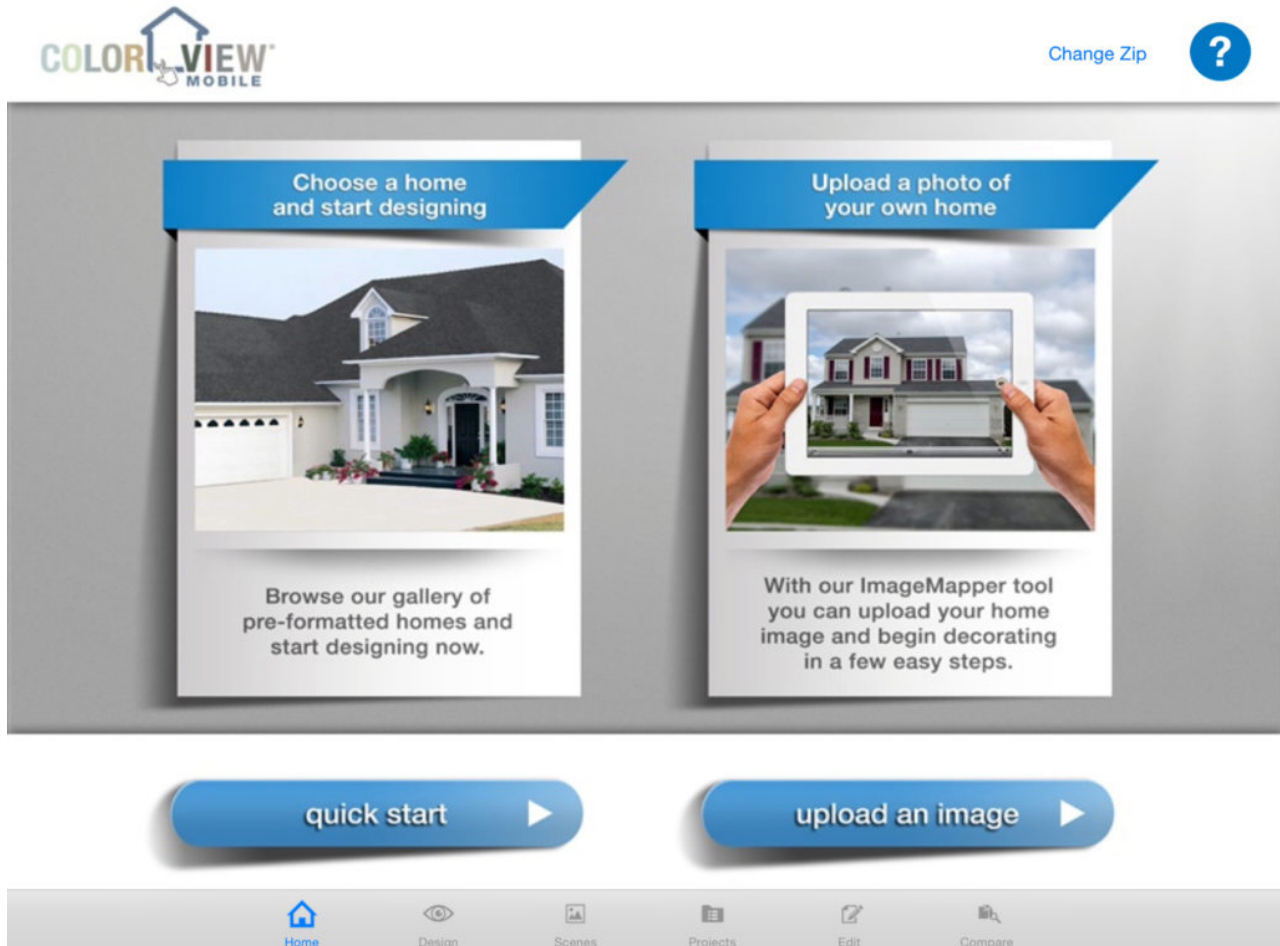

Then, click the start button

The tool will allow you to define certain areas such as a corner of a wall or a segment of the roof

There will be options to make changes to certain parts of the image to reflect the desired final product

Once the changes have been made, the picture can be saved so that our team can take a look at it, allowing us to help you make your vision a reality

We hope that clients will use this tool to bring their vision to life. This is a great way for people to take a look at what their roof might look like when our professionals have finished with their task. Rely on the professionals to make the roof of your dreams come to life!

Rely on Vertex Roofing for All of Your Roofing Needs
